Forward-Looking Statements; Non-GAAP Financial Measures

The following information is current as of December 31, 2017 (unless otherwise noted) and should be read in connection with Navient Corporation's (Navient) Annual Report on Form 10-K for the year ended December 31, 2017 (the "2017 Form 10-K"), filed by Navient with the Securities and Exchange Commission (the "SEC") on February 26, 2018 and subsequent reports filed by Navient with the SEC. Definitions for capitalized terms in this presentation not defined herein can be found in our 2017 Form 10-K. This presentation contains "forward-looking" statements and other information that is based on management's current expectations as of the date of this presentation. Statements that are not historical facts, including statements about the company's beliefs, opinions or expectations and statements that assume or are dependent upon future events, are forward-looking statements and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," or "target." Forward-looking statements are subject to risks, uncertainties, assumptions and other factors that may cause actual results to be materially different from those reflected in such forward-looking statements.

For Navient, these factors include, among others, the risks and uncertainties associated with :

- · increases in financing costs or the availability of financing:
- limits on our liquidity resulting from disruptions in the capital markets or other factors;
 unanticipated increases in costs associated with compliance with federal, state or local laws and regulations;
- changes in the demand for asset management and business processing solutions or other changes in the marketplaces including increased competition in which we compete;
 changes in accounting standards including but not limited to changes pertaining to loan loss reserves and estimates or other accounting standards that may impact our operations;
- · adverse outcomes in any significant litigation to which the company is a party;
- credit risk associated with the company's underwriting standards or exposure to third parties, including counterparties to the company's hedging transactions; and
 changes in the terms of education loans and the educational credit marketplace generally (including changes resulting from new laws and the implementation of existing laws).

The company could also be affected by, among other things:

- unanticipated repayment trends on loans including prepayments or deferrals on loans in our FFELP securitization trusts that could accelerate or delay repayment of the bonds beyond their legal final maturity date;
 reductions in our credit ratings, the credit ratings of asset-backed securitizations we sponsor or the credit ratings of the United States of America;
 failures of our operating systems or infrastructure or those of third-party vendors;

- risks related to cybersecurity including the potential disruption of our systems or of our customers or our third-party vendors or customers or potential disclosure of confidential customer information;
 damage to our reputation resulting from cyber-breaches, litigation, the politicization of student loan servicing or other actions or factors;
- failure to successfully implement cost-cutting initiatives and adverse effects of such initiatives on our business;
- failure to adequately integrate acquisitions or realize anticipated benefits from acquisitions including delays or errors in converting portfolio acquisitions to our servicing platform;
 changes in law and regulations whether new laws or regulations or new interpretations of existing laws or regulations applicable to any of our businesses or activities or those of vendors, suppliers, or customers; • changes in the general interest rate environment, including the availability of any relevant money market index rate, including LIBOR, or the relationship between the relevant money-market index rate and the rate at which our assets are priced;
- · our ability to successfully effectuate any acquisitions and other strategic initiatives;
- changes in general economic conditions; and the other factors that are described in the "Risk Factors" section of Navient's Annual Report on Form 10-K and in its future reports filed with the Securities and Exchange Commission.

The preparation of the company's consolidated financial statements also requires management to make certain estimates and assumptions including estimates and assumptions about future events. These estimates or assumptions may prove to be incorrect and actual results could differ materially. All forward-looking statements contained in this release are qualified by these cautionary statements and are made only as of the date of this release. The company does not undertake any obligation to update or revise these forward-looking statements except as required by law.

Navient reports financial results on a GAAP basis and also provides certain non-GAAP "core earnings" performance measures. When compared to GAAP results, "core earnings" exclude the impact of: (1) unrealized, mark-to-market gains/losses on derivatives; and (2) goodwill and acquired intangible asset amortization and impairment. Navient provides core earnings measures because this is what management uses when making management decisions regarding Navient's performance and the allocation of corporate resources. Navient core earnings are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies. For additional information, see "Core Earnings — Definition and Limitations" in Navient's fourth quarter earnings release for a further discussion and a complete reconciliation between GAAP net income and core earnings.

NAVIENT

- Navient provides asset management and business processing solutions to education, healthcare, and government clients at the federal, state, and local levels. We help our clients and millions of Americans achieve financial success through our services and support.
 - \$105 billion education loan portfolio, of which 78% is insured or guaranteed
 - Servicing more than \$300 billion in student loans, the company supports the educational and economic achievements of approximately 12 million Americans
 - Asset recovery and business processing platforms provide services for over 1,000 public and private sector clients

¹ Deferment includes customers who have returned to school or are engaged in other permitted educational activities and are not yet required to make payments on the loans, e.g., residency periods for medical students or a grace period for bar exam preparation.

² Loans for customers who have requested extension of grace period generally during employment transition or who have temporarily ceased making full payments due to hardship or other factors such as disaster relief, consistent with established loan program servicing policies and procedures.

³ The period of delinquency is based on the number of days scheduled payments are contractually past due.

The probability of default substantially diminishes as the number of payments made increases

College graduates continue to experience substantial earnings premium

Median wages for recent graduates by degree type

- The difference in median wages between college graduates has grown 4 percent since 2008, rising to a 50 percent differential in 2017.
- Since 2012, recent college graduates have seen median wages rise even more quickly, by 3.6 percent.
- Median wages for workers with only a high school diploma have fallen 1.6 percent since the Great Recession.

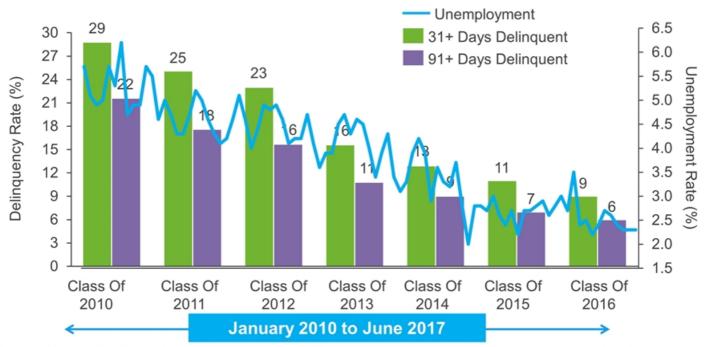

Source: Federal Reserve Bank Of New York, "The Labor Market for Recent College Graduates: Wages," last updated January 12, 2018.

Notes: Annual wages are expressed in constant 2017 dollars. Recent college graduates are those aged 22 to 27 with a bachelor's degree only; high school graduates are those aged 22 to 27 with a high school diploma only. Figures are for full-time workers and exclude those currently enrolled in school.

Navient's default prevention expertise was a key factor in the decline of the national default rate

- The cohort default rate (CDR)
 measures the percent of borrowers
 who defaulted on a student loan
 within three years of entering
 repayment.
- In 2017, the Department of Education announced the 2014 CDR was 11.5 percent, a small increase from 2016 (11.3 percent) and a significant decrease since 2013 (14.7 percent).
- The CDR for Navient-serviced customers was 7.8 percent, 37 percent lower than the national rate excluding Navient-serviced borrowers.
- Our outreach to borrowers is key.
 Nine times out of 10, if we can reach a struggling borrower, we can help him or her avoid default.

2014 three-year cohort default rate

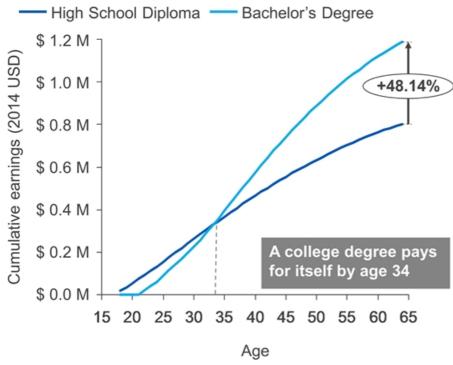

Source: "Official Cohort Default Rates for Schools," Federal Student Aid, 9/27/17; Navient data
The 2014 Cohort Default Rate analyzes data from the group of borrowers who entered repayment between Oct. 1, 2013, and Sept. 30, 2014, and who defaulted in a threeyear window by fall of 2016. To isolate the difference in defaults between Navient borrowers and others, the difference is calculated by removing Navient's market share from
the overall national cohort default rate; the resulting CDR for non-Navient serviced borrowers is 12.4 percent.

The benefits of obtaining a college degree outweigh the costs by a wide margin

Cumulative earnings net of college repayment costs

"Combined, the workers with a Bachelor's degree or higher have accounted for 73 percent (8.4 million) of the 11.6 million jobs gained in the recovery."

- Georgetown University Researchers, 2016

"The lifetime financial benefits of an education have never been so high."

Guillaume
 Vandenbrouckemes,
 Federal Reserve Bank of
 St. Louis, 2015

The 2017 Money Under 35 study reconfirms the value of a college degree for young adults

College is a solid investment for those who complete their degree.

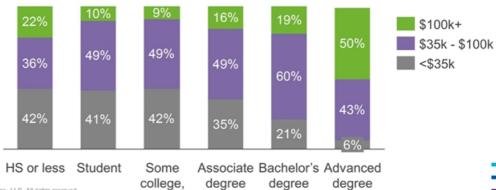

- · College degree holders are more likely to be employed and have higher incomes than those with some college education but no degree.
- Additionally, 54 percent of young adults believe they will be better off than their parents.
 - 60 percent of degree holders agree with this statement, compared to 50 percent of nondegree holders.

Employment status by level of education attained

Personal income by level of education attained

no degree

degree degree

Non-completers of college have the highest instances of poor financial health

Average financial health index score by education level, 2017

Self-reported financial health scores increase with higher levels of educational attainment, with the exception of individuals who started, but did not complete, college.

 Young adults who attended college but have not earned a degree are more likely to have a poor financial health index score than have an excellent financial health index score.

Long-term capital allocation philosophy

Consistently balance capital adequacy with capital allocation opportunities, including organic growth, stock repurchases and acquisitions

- Execute dynamic capital allocation policy to maintain appropriate leverage that supports our credit ratings and enhances ongoing access to unsecured debt markets
 - Execute TNA ratio ¹ within guidance
 - Critical to delivering shareholder value
- Maintain dividend
- ✓ Invest capital generated from legacy portfolio and operating businesses among the following:
 - Loan growth (portfolio acquisitions and refi originations); Share repurchases; Acquisitions that exceed our investment return hurdle
- ✓ Committed to ensuring excess capital is returned to shareholders

1 The tangible net asset (TNA) ratio equals GAAP tangible assets less secured debt and other liabilities adjusted for the impact of derivative accounting under GAAP and unamortized net floor premiums divided by unsecured deltanged.

Ξ

Capital allocation prioritization

Within our 1.20 - 1.30x TNA ratio ¹ guidance, will manage business to 1.23 - 1.25x by year end 2018

· Quarterly Dividend

- · Returned over \$800 million to shareholders in dividends since separation
- · Expect to maintain quarterly dividend of 16 cents per share, or over \$160 million in 2018

 Education Loan Asset Generation

- Opportunistic acquirer of education loans, having acquired nearly \$30 billion in education loans since separation (0.5 – 8% target capital)
- Expect to originate over \$1.5 billion in education refinance loans in 2018 with 5% target capital

 Stock Repurchases and Acquisitions

- Returned \$2.5 billion to shareholders in repurchases and acquired complementary growth businesses for ~\$585 million since separation
- In 2017, returned \$440 million to shareholders in repurchases, acquired Duncan Solutions and Earnest for ~\$235 million, and allocated ~\$210 million of capital to the acquisition of the JP Morgan Chase education loan portfolio
- Mitigate impact of legacy portfolio amortization through share repurchases and growth from acquisitions
 - Near-term focus on integration of acquisitions and organic growth Investment return hurdle above cost of capital - future acquisitions require synergies

Recent FFELP ABS Issuance Characteristics

FFELP ABS Transaction Features

- Issue size of \$500M to \$1.0B
- Denominated in US\$
- · Senior and subordinate notes
- Floating rate tied to 1 month LIBOR
- Amortizing tranches with 1 to 15(+) year average lives
- Compliant with U.S. risk retention regulations
- · Navient Solutions, LLC is master servicer

Collateral Characteristics

- Insurance or guarantee of underlying collateral insulates bondholders from most risk of loss of principal¹
- Typically non-dischargeable in bankruptcy
- Offer significantly higher yields than government agency securities with comparable risk profiles

Ξ

¹ Principal and accrued interest on underlying FFELP loan collateral carry insurance or guarantee of 97%-100% dependent on origination year and on meeting the servicing requirements of the U.S. Department of Education.

FFELP Loan Program Characteristics

Navient Stafford & PLUS Loan Prepayments

- Annualized CPRs for Stafford/PLUS ABS trusts have decreased from pre-2008 levels as incentives for borrowers to consolidate have declined
- Higher prepayment activity in mid 2012 was related to the short term availability of the Special Direct Consolidation Loan program
- Prepayments increased beginning in 2014 as we purchased assets from selected transactions to mitigate the risk that certain tranches might remain outstanding past their legal final maturity dates

* Quarterly CPR assumes School and Grace loans are not scheduled to make payments. Deferment, Forbearance and Repayment loans are scheduled to make payments

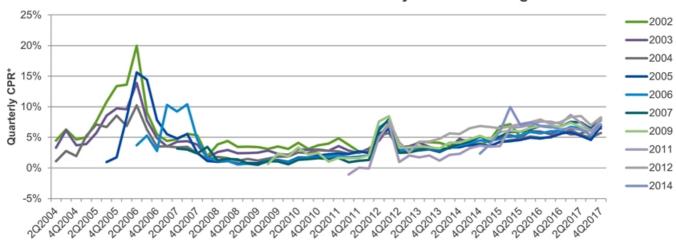

Ξ

Confidential and proprietary information @ 2018 Navient Solutions, LLC. All rights reserved

Navient Consolidation Loan Prepayments

- CPRs for Consolidation ABS trusts declined significantly following legislation effective in 2006 that prevented in-school and re-consolidation of borrowers' loans
- Higher prepayment activity in mid 2012 was related to the short term availability of the Special Direct Consolidation Loan program

Historical Consolidation ABS CPRs by Issuance Vintage

* Quarterly CPR assumes School and Grace loans are not scheduled to make payments. Deferment, Forbearance and Repayment loans are scheduled to make payments.

Navient Portfolio Transition to Seasoned Collateral

- Securitized collateral will continue to season given the company transitioned from originations to portfolio acquisition and management
- · Most defaults occur early in repayment; loan performance improves as loans season
- As of December 2017, the private securitized loan portfolio is approximately 96 months into repayment; about 84% of total expected defaults have already occurred

Navient Private Education Loan Trusts – Prepayment Analysis

 Constant prepayment rates increased in 2007 due to the introduction of Private Education Consolidation loans, then declined following our decision to suspend our consolidation loan program in 2008

Confidential and proprietary information @ 2018 Navient Solutions, LLC. All rights reserved

- The following cohort default triangles provide loan performance information for certain Private Education Loans of Navient Corporation and its consolidated subsidiaries that meet such subsidiaries' securitization criteria (including those criteria listed below):
 - Program types include Undergraduate/Graduate ¹, Direct-to-Consumer ("DTC") ², Career Training ³ and Private Consolidation Loans
 - FICO scores are based on the greater of the borrower and cosigner scores as of a date near the loan application and must be at least 640
- The cohort default triangles are not representative of the characteristics of the portfolio of Private Education Loans of Navient Corporation and its consolidated subsidiaries as a whole or any particular securitization trust.

- 1. Undergraduate/Graduate loans marketed under the Signature Student Loan brand.
- Direct-to-Consumer Loans marketed under the Tuition Answer brand.
- 3. Career Training loans provide eligible borrowers financing at technical, trade, K-12 or tutoring schools.

- The cohort default triangles featured on subsequent slides are segmented by loan program type, FICO score, cosigner status, and school type
- · Terms and calculations used in the cohort default triangles are defined below:
 - Repayment Year The calendar year loans entered repayment
 - <u>Disbursed Principal Entering Repayment</u> The amount of principal entering repayment in a given year, based on disbursed principal prior to any interest capitalization
 - Years in Repayment Measured in years between repayment start date and default date. Zero represents defaults that occurred prior to the start of repayment.
 - Periodic Defaults Defaulted principal in each Year in Repayment as a percentage of the disbursed principal entering repayment in each Repayment Year
 - · Defaulted principal includes any interest capitalization that occurred prior to default
 - · Defaulted principal is not reduced by any amounts recovered after the loan defaulted
 - Because the numerator includes capitalized interest while the denominator does not, default
 rates are higher than if the numerator and denominator both included capitalized interest
 - Total The sum of Periodic Defaults across Years in Repayment for each Repayment Year
